

LUNA SARMIENTO

FULL STACK WEB
DEVELOPER

ABOUT ME

Nice to meet you! My name is Luna, and I love programming. What excites me the most about this field is the opportunity to combine my creative side with my logical and rational thinking. Thanks to my past experiences, I am very skilled at working in teams and am also highly patient.

SOFT SKILLS

- Spanish (native speaker)
- Italian (native speaker)
- English (C1)

TECH SKILLS

- | | |
|----------------|----------------|
| • React.js | • MongoDB |
| • React Native | • Git |
| • Next.js | • Mobile IDEs |
| • Node.js | • Redux |
| • Express | • Figma / Miro |

CONTACTS

Address: Via Augusto Murri 66
Bologna, Italy

PROFESSIONAL EXPERIENCES

Front-End Developer

Enhancers - Tinexta Group | March 2022 - Present

Responsible for maintaining three mobile apps, following the Agile methodology and using React Native and TypeScript:

- hOn: A cutting-edge system for smart home management. Collaborated with a team of approximately 30 people to ensure a smooth and responsive user interface. Implemented advanced features, such as remote control of home devices and energy management. Responsible for both implementing new features and bug fixing.
- CAME: An app for remote control and access management. Took full ownership of the workflow process within a two-person team, from overall architecture design to quality control. Implemented functionalities like secure access and event monitoring.
- DAB: An app for monitoring and controlling pumping systems. Played a key role in a team of four people, managed an intern and established a direct relationship with the client. Made significant contributions to ensuring an efficient and intuitive frontend, including post-collaboration support for the client.

These experiences have enhanced my expertise in frontend development for mobile applications, enabling me to tackle complex challenges and deliver innovative solutions for clients.

EDUCATION

EPICODE

Full Stack Diploma | May 2021 - November 2021

1200+ hours of coding

20+ team and individual projects, fully developed in an international and remote environment
